

Drill-Phish

a strategic platform to ensure organization wide cybersecurity awareness & compliance

Overview

Since we wholeheartedly believe in the 'better safe than sorry' motto, we built Drill-phish to present companies with a wide variety of multilingual tools and techniques that boost cyber security awareness. These include educational training courses, animated videos, brief slides, interactive walkthroughs, and explanatory posters/flyers.

Drill-Phish is a cybersecurity awareness platform, fundamentally aims at giving insights into the awareness levels of an organization's employees about cybersecurity, and to increase their awareness using an extensive awareness library.

Key Values

01. Awareness

1. Department-Specific Training

- Tailored content for each department and role Executives, Technical teams, and General staff.

2. Role-Based Awareness

- Specialized modules for Finance, Legal, HR, Technical Support, IT, and more.

3. Largest Arabic Awareness Library

- Over 500+ unique Arabic cybersecurity content items.

4. Gamified Learning

- Leaderboards, points, and competitions to boost engagement.

5. Localized Threat Scenarios

- Awareness based on real phishing patterns in the user's region.

02. Phishing Simulation

1. Phishing Simulation

- Targeted phishing campaigns based on user roles, departments, or risk levels. Pre-built and customizable templates designed to simulate real-world phishing attacks.

2. Culture-Driven Phishing Templates

- Realistic templates customized for each country and industry.

3. Multi-Channel Phishing Campaigns

- Email, QR-code, USB, and HID-based phishing simulations.

4. Easy Reporting

- Employees can easily report suspicious emails, and administrators can review all reports in an organized dashboard.
